lo cloud.
n high cloud which should allow some sunlight through.
oud which is likely to obscure the sun, but the base will be above 1500ft.
cloud with base between 1000ft and 1500ft, likely obscuring the sun.
cloud with base between 400ft and 1000ft, likely obscuring the sun.
cloud with base between 200ft and 400ft, likely obscuring the sun.
ud with base below 200ft, likely obscuring the sun.

copyright Met Office

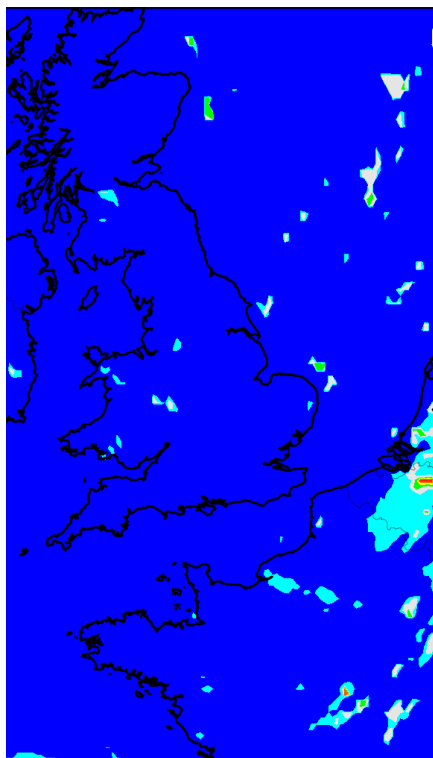

Summary: Sunny spells and isolated showers through with moderate northerly winds. There may be some low cloud across northern France at first, accompanied by some organised showers. Otherwise cloud bases will be above 1500ft even in the showers and visibility will be very good or excellent. There should be decent cloud breaks too, these probably more numerous than the graphics suggest.
